

StarUI Documentation

Documentation Index · docs/latest · generated 2026-08-02

The current documentation set for the StarUI (MarketsUI) platform.

DOCUMENT	WHAT IT COVERS	AUDIENCE
overview.md →	what StarUI is, capabilities at a glance	everyone — start here
getting-started.md →	installing, first grid, theming, demo apps, platform dev loop	app builders + contributors
architecture.md →	layer model, dependency graph, runtime host/port model, data services, build & consumption tracks — with diagrams	engineers + reviewers
packages.md →	per-package reference: role, export subpaths, peers	anyone importing a package

Related references (outside this set)

DOCUMENT	PURPOSE
current-features.md	granular inventory of every shipped feature, kept in lockstep with code
APPS_REPO.md	the <code>apps/</code> tree: two consumption tracks, platform linking, workflows
WORKLOG.md	known-open items — check before starting work
COVERAGE_PLAN.md	the 70%-per-file coverage effort and its binding conventions
CLAUDE.md	agent/contributor rulebook

Print editions — each document in this set also ships as a PDF under `pdf/`, regenerated from the markdown by `pdf/build.mjs`.

Historical design notes live in `docs/superpowers/`; one-off deep dives (packaging changelog, hub fan-out optimizations, Sonar LCOV notes) remain in `docs/`.
